

Left hand archery glove by Manda

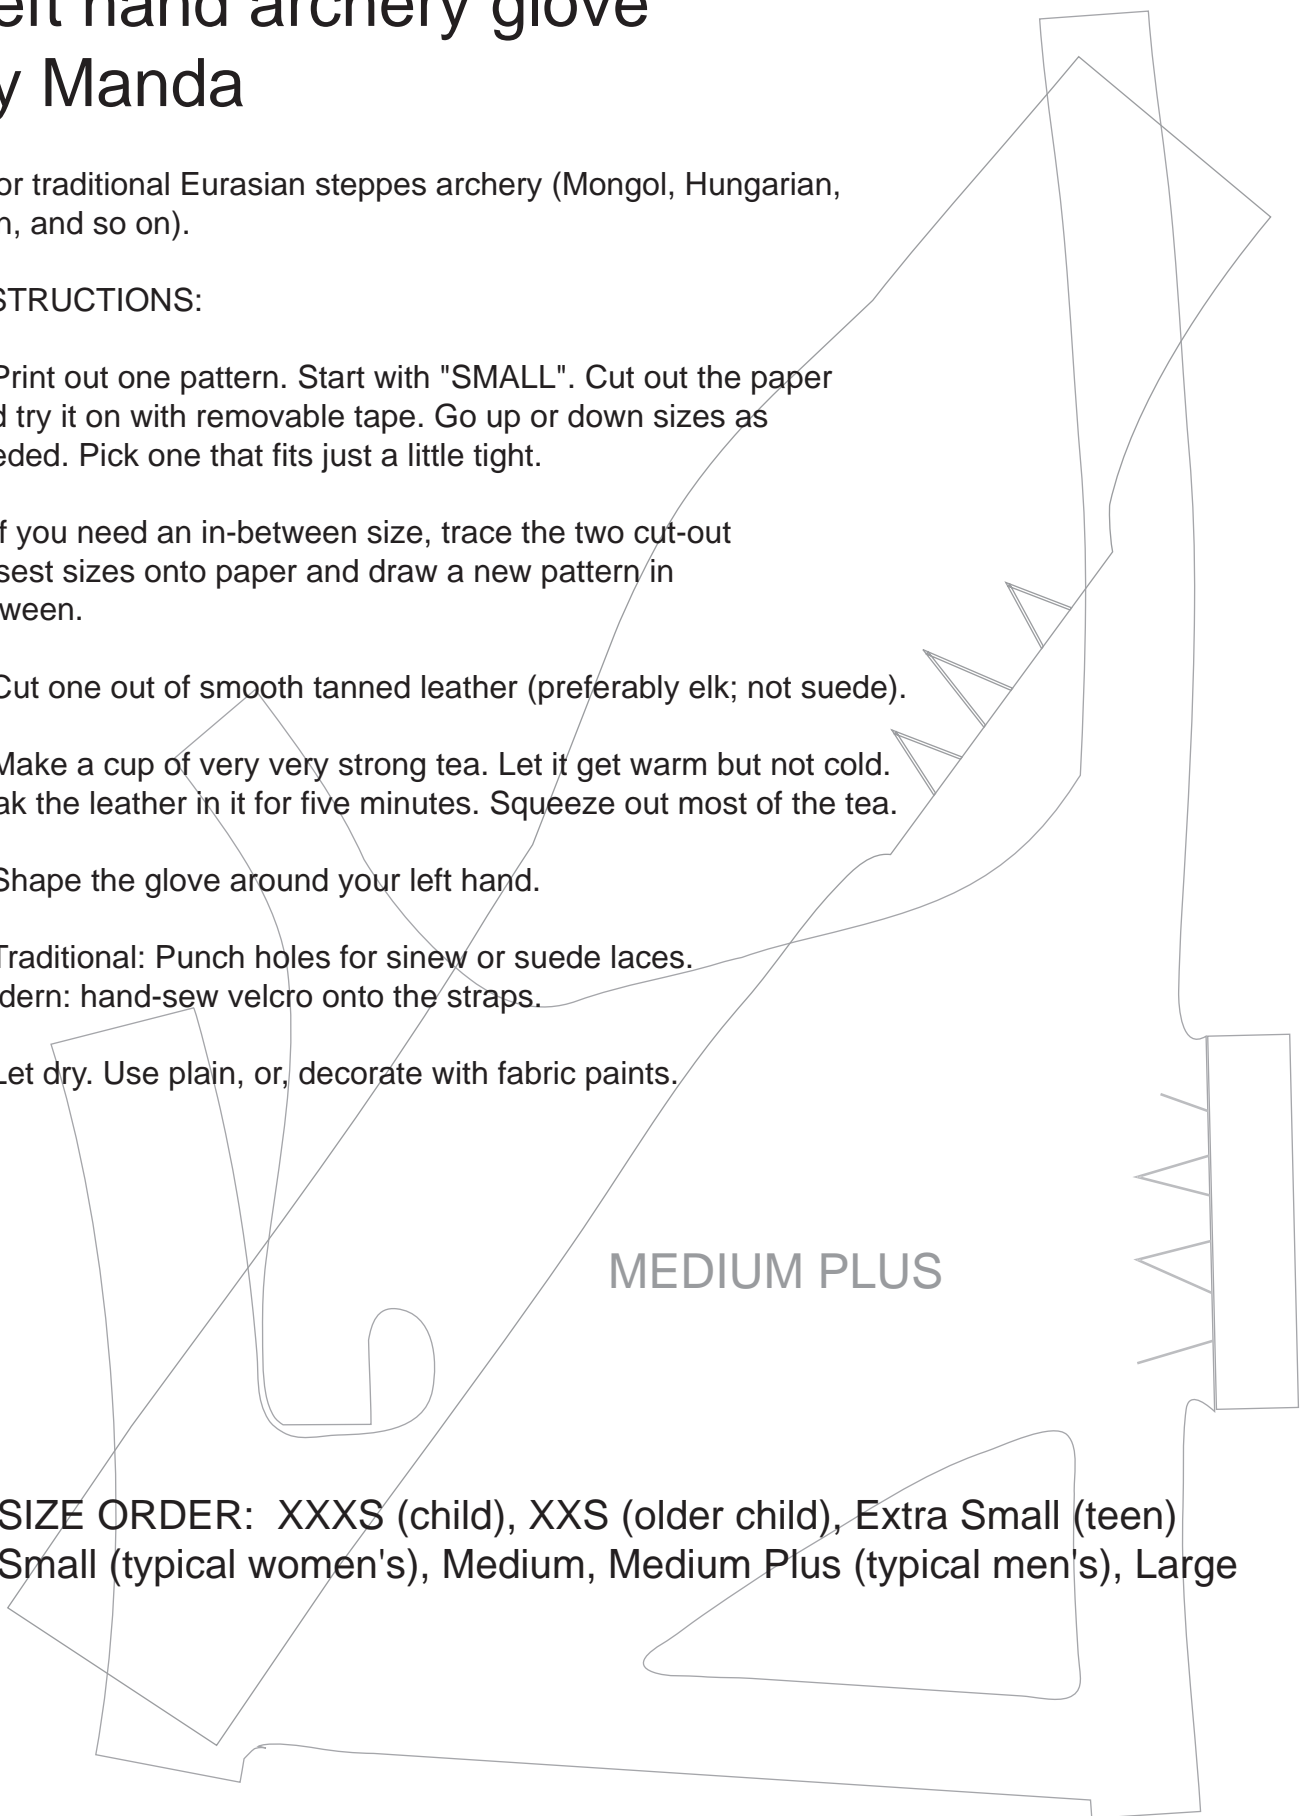

--For traditional Eurasian steppes archery (Mongol, Hungarian, Hun, and so on).

INSTRUCTIONS:

1. Print out one pattern. Start with "SMALL". Cut out the paper and try it on with removable tape. Go up or down sizes as needed. Pick one that fits just a little tight.
2. If you need an in-between size, trace the two cut-out closest sizes onto paper and draw a new pattern in between.
3. Cut one out of smooth tanned leather (preferably elk; not suede).
4. Make a cup of very very strong tea. Let it get warm but not cold. Soak the leather in it for five minutes. Squeeze out most of the tea.
5. Shape the glove around your left hand.
6. Traditional: Punch holes for sinew or suede laces.
Modern: hand-sew velcro onto the straps.
7. Let dry. Use plain, or, decorate with fabric paints.
